| 1 | Integrating shape and pattern in mammalian models | 82% |
| | Marcelo Walter , Alain Fournier , Daniel Menevaux
Proceedings of the 28th annual conference on Computer graphics and interactive techniques August 2001
The giraffe and its patches, the leopard and its spots, the tiger and its stripes are spectacular examples of the integration of a pattern and a body shape. We present an approach that integrates a biologically-plausible pattern generation model, which can effectively deliver a variety of patterns characteristic of mammalian coats, and a body growth and animation system that uses experimental growth data to produce individual bodies and their associated patterns automatically. We use the e ... | |
